

# Welcome to Biology Honors Where it is good to be a cougar! Mrs. Vesta

Biology is a fun and exciting class! You will learn all about living things and their environment! We will explore their insides, including their microscopic cells, and then study how living things evolve, behave and interact with each other and their environment! You will learn to think like scientists; asking questions, designing experiments and drawing your own conclusions about living things! Many days we will learn all of these things using a fun hands-on approach! Classroom dynamics is an important part of a fun, yet structured, biology class and I need your help. You will need to come to class prepared to **THINK, DO, LISTEN AND LEARN** each day!

## Supplies

### PLEASE BE PREPARED TO LEARN EACH DAY!

- ❖ 1-inch, 3 ring binder, or a section in a large binder
- ❖ Notebook paper, if using a spiral make sure there is a way to tear it out so it is neat on the edges
- ❖ writing utensils – blue or black pen and pencils with erasers
- ❖ Your textbook
- ❖ Your agenda book (given to you for free)
- ❖ Suggested items: colored pencils and markers, a ruler, a protractor, graph paper.
